

USER ACCEPTANCE TESTING (UAT) TEMPLATE

Pocket Smart AI: Your Smart Budget & Recommendation Assistant

Date: 30 September 2026

Team ID: SWTID-2026-3350

Team Size: 4

Team Leader: Esther Ammo M

Team Members: Epsipa R, Eswari M, Fayisa Fathima A

Project Name: PocketSmart AI –Your Smart Budget & Recommendation Assistant

Maximum Marks: 5 Marks

Project Overview

PocketSmart AI – Your Smart Budget & Recommendation Assistant is an AI-powered application designed to help users manage their personal finances. The application allows users to record income and expenses, manage budgets, view financial information, and receive AI-powered budgeting and personalized recommendations.

The UAT verifies the major user workflows, including user access, financial data entry, expense and budget management, dashboard information, AI recommendations, validation, backend processing, frontend interaction, and overall application readiness.

Project Version: not provided

Testing Period: not provided

Testing Environment/URL: local environment , <http://127.0.0.1:8000>

(documented target)

API documentation : <http://127.0.0.1:8000/docs>

Credentials(if required) : not provided

Testing Scope

UAT covers the following major PocketSmart AI functionality:

1. User registration and authentication
2. User profile management
3. Income management
4. Expense management
5. Budget management
6. Dashboard and financial summary
7. AI-powered budget recommendations
8. Personalized recommendations
9. AI assistant interaction
10. Data persistence and backend validation
11. Frontend forms and navigation
12. Error handling and validation
13. Security and protected routes
14. Deployment and testing
15. Documentation and demonstration readiness

Test Cases:

Test Case ID	User Story / Topic	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC - 001	User Registration	Verify that a new user can register	1. Open registration page. 2. Enter valid user details. 3. Click Register.	A new user account is created successfully.	To be recorded during testing.	Pass/Fail
TC - 002	User Login	Verify user authentication	1. Open login page. 2. Enter valid	User is authenticated and	To be recorded	Pass/Fail

			credentials. 3. Click Login.	redirected to the appropriate page/dashboard.	during testing .	
TC - 003	Invalid Login	Verify handling of incorrect credentials	1. Enter incorrect email/password. 2. Click Login.	Appropriate authentication error is displayed and access is denied.	To be recorded during testing .	Pass/Fail
TC - 004	User Profile	Verify profile information	1. Login. 2. Open Profile. 3. Review information.	User profile information is displayed correctly.	To be recorded during testing .	Pass/Fail
TC - 005	Income Management	Verify adding income	1. Open Income section. 2. Enter valid income details. 3. Save.	Income is stored successfully and reflected in the financial summary.	To be recorded during testing .	Pass/Fail
TC - 006	Expense Management	Verify adding an expense	1. Open Expense section. 2. Enter amount/category/details. 3. Save.	Expense is stored successfully and reflected in the expense summary.	To be recorded during testing .	Pass/Fail
TC - 007	Expense Management	Verify editing/deleting expenses	1. Select an existing expense. 2. Edit or delete it. 3. Save/confirm.	Expense information is updated or removed correctly.	To be recorded during testing .	Pass/Fail
TC - 008	Budget Management	Verify creation of a budget	1. Open Budget section. 2. Enter category and budget amount. 3. Save.	Budget is created and displayed correctly.	To be recorded during testing .	Pass/Fail
TC - 009	Budget Monitoring	Verify budget tracking	1. Create a budget. 2. Add related expenses. 3.	Spent amount and remaining	To be recorded	Pass/Fail

			Review budget status.	budget are calculated and displayed correctly.	during testing .	
TC - 010	Dashboard	Verify financial dashboard	1. Login. 2. Open Dashboard. 3. Review financial summary.	Dashboard displays available income, expenses, budget and related financial information correctly.	To be recorded during testing .	Pass/Fail
TC - 011	AI Budget Recommendation	Verify AI-generated budget recommendations	1. Enter financial information. 2. Request recommendation. 3. Review AI response.	AI generates a relevant recommendation based on the information supplied.	To be recorded during testing .	Pass/Fail
TC - 012	Personalized Recommendation	Verify personalized recommendations	1. Enter income and spending information. 2. Request recommendation.	Application provides a recommendation relevant to the user's supplied financial information.	To be recorded during testing .	Pass/Fail
TC - 013	AI Assistant	Verify AI assistant interaction	1. Open AI Assistant. 2. Enter a financial question. 3. Submit.	AI assistant returns an understandable response.	To be recorded during testing .	Pass/Fail
TC - 014	Data Persistence	Verify storage of financial information	1. Add income/expense/budget. 2. Save. 3. Refresh/reopen application. 4. Check records.	Saved information remains available without unintended data loss.	To be recorded during testing .	Pass/Fail
TC - 015	Backend Validation	Verify backend validation	1. Submit valid and invalid data. 2.	Backend accepts valid information	To be recorded	Pass/Fail

			Review server response.	and rejects invalid information appropriately.	during testing.	
TC - 016	Frontend Development	Verify forms and result display	1. Open application. 2. Enter required information. 3. Submit forms. 4. Review results.	Forms accept data correctly and results are displayed in the intended interface.	To be recorded during testing.	Pass/Fail
TC - 017	Navigation	Verify application navigation	1. Navigate through Dashboard, Income, Expense, Budget and AI sections.	All supported pages are accessible and navigation works correctly.	To be recorded during testing.	Pass/Fail
TC - 018	Validation	Verify invalid financial inputs	1. Enter empty/invalid amount. 2. Submit form.	Appropriate validation message is displayed and invalid data is not accepted.	To be recorded during testing.	Pass/Fail
TC - 019	Security	Verify protected application access	1. Log out. 2. Attempt to access a protected page directly.	Unauthorized access is denied or redirected to the appropriate authentication page.	To be recorded during testing.	Pass/Fail
TC - 020	Logout	Verify logout functionality	1. Login. 2. Click Logout. 3. Attempt to access authenticated features.	User is logged out and protected functionality is no longer accessible without authentication.	To be recorded during testing.	Pass/Fail

TC - 021	Deployment & Testing	Verify local application deployment	1. Install requirements. 2. Configure environment variables. 3. Start application. 4. Execute main workflows.	Application starts successfully and major workflows function as documented.	To be recorded during testing .	Pass/Fail
TC - 022	Documentation & Demonstration	Verify final project readiness	1. Review project files. 2. Check screenshots/results. 3. Review demonstration material.	Required documentation and demonstration materials are complete and ready for submission.	To be recorded during testing .	Pass/Fail

Detailed UAT Scenarios

TC-011 – AI Budget Recommendation

Objective: Verify that PocketSmart AI generates a budget recommendation using the financial information provided by the user.

Test Steps:

1. Login to PocketSmart AI.
2. Enter income information.
3. Enter expense information.
4. Enter relevant budget information.
5. Request an AI recommendation.
6. Review the generated response.

Expected Result:

The system should generate a clear recommendation based on the information provided by the user.

Actual Result:

Status: Pass / Fail

TC-012 – Personalized Recommendation

Objective: Verify that the application provides recommendations based on the user's supplied financial information.

Test Steps:

1. Enter financial details.
2. Provide spending information.
3. Request a personalized recommendation.
4. Review the result.

Expected Result:

The application should return a recommendation that corresponds to the information supplied by the user.

Actual Result:

Status: Pass / Fail

TC-013 – AI Assistant

Objective: Verify that users can interact with the AI assistant.

Sample Input:

"How can I reduce my monthly expenses?"

Expected Result:

The AI assistant should return a relevant and understandable response.

Actual Result:

Status: Pass / Fail

Negative Testing:

Test ID	Negative Scenario	Expected Result	Status
NEG-001	Register with empty fields	Validation messages should be displayed	
NEG-002	Register with invalid email	Invalid email should be rejected	
NEG-003	Login with incorrect password	Authentication should fail	
NEG-004	Submit empty income amount	Input should be rejected	
NEG-005	Enter invalid expense amount	Appropriate validation should be displayed	
NEG-006	Enter invalid budget amount	Budget should not be saved	
NEG-007	Submit empty AI question	Validation should be displayed	
NEG-008	Access protected page without login	Access should be denied/redirected	
NEG-009	AI service unavailable	Appropriate error message should be displayed	
NEG-010	Submit incomplete financial information	Application should handle the input appropriately	

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
--------	-----------------	--------------------	----------	--------	---------------------

BG-001	To be recorded if an issue is identified during UAT.	To be recorded during UAT.	Low / Medium / High	Open / In Progress / Closed	Add tester feedback and reproduction details.
BG-002	To be recorded if an issue is identified during UAT.	To be recorded during UAT.	Low / Medium / High	Open / In Progress / Closed	Add tester feedback and reproduction details.
BG-003	To be recorded if an issue is identified during UAT.	To be recorded during UAT.	Low / Medium / High	Open / In Progress / Closed	Add tester feedback and reproduction details.
BG-004	To be recorded if an issue is identified during UAT.	To be recorded during UAT.	Low / Medium / High	Open / In Progress / Closed	Add tester feedback and reproduction details.
BG-005	To be recorded if an issue is identified during UAT.	To be recorded during UAT.	Low / Medium / High	Open / In Progress / Closed	Add tester feedback and reproduction details.

UAT Execution Summary:

Category	Total	Passed	Failed	Not Tested
Registration & Login				
Profile Management				
Income Management				
Expense Management				
Budget Management				
Dashboard				
AI Recommendations				
AI Assistant				
Backend & Database				
Frontend & Navigation				
Security & Validation

UAT Notes

- Testers should execute each test case using valid and invalid inputs where applicable.
- The **Actual Result** and **Pass/Fail** fields should be completed after execution.
- Any identified defect should be recorded in the Bug Tracking section.
- Bug reports should include clear reproduction steps and severity.
- Testers should provide feedback and suggestions for improvement.
- Screenshots may be attached as evidence for failed or important test cases.
- Final sign-off should be obtained after the UAT test cases have been executed and reviewed.

The structure above follows the uploaded reference document's approach: project overview, testing scope, numbered test cases, bug tracking, sign-off, and UAT notes.
